- **Frontend Development:** React.js, GSAP (animations), Tailwind CSS, Responsive Design, Component-based Architecture, Performance Optimization
- **Backend Development:** REST APIs, Data Handling, MVC Architecture, CRUD Operations, Authentication & Authorization, Validation, Exception Handling, Database Integration, Express.js
- **Databases:** PostgreSQL, MySQL, MongoDB (basic)
- **APIs & Integration:** REST API
- **Development Tools & Platforms:** Git, GitHub, Visual Studio Code, IntelliJ, Postman, MongoDB Compass, AWS, Docker

Academic & Project Experience

Personal Portfolio Website

- Developed a responsive portfolio website to showcase skills, projects, resume, and contact information.
- Implemented interactive animations and modern UI using GSAP + React.js.
- Designed reusable components and optimized performance for smooth user experience.
- Deployed on Vercel for live access: morpalmaurya.vercel.app (morpalmaurya.vercel.app)

Mac OS Web Interface

- Built an interactive Mac OS-inspired web interface using React.js.
- Designed desktop-style UI with draggable windows and interactive elements.
- Implemented reusable React components and event-driven interactions.
- Developed responsive layout with HTML, CSS, JavaScript, React.js.
- Deployed on Vercel for live access: mac-os-morpalmaurya-vqfp.vercel.app

StudyNotion – EdTech Platform

Developed a full-stack EdTech platform for online learning and course management.

Implemented user authentication, course browsing, enrollment, and backend API integration.

Built a responsive and interactive UI using React.js.

Deployed the application on Vercel for live access: studynotion-edtech-project-main-1r4.vercel.app

Certifications

- MERN Stack Certification – Codehelp
- C , C++ And DSA Programming Certification – PWSkill- iNeuron
- Java Certification – MySirG
- Java Collection Framework -Codehelp
